Wow, this game is surprisingly great, I bought it thinking it's some racing clone of Zombie Driver HD converted to 3D enviroment, but no, it's different, despite some tracks are really similar. It's more like a mix of Flatout and The Death Race (the movie, you know, this newer one with Statham). First cars are a joke and driving them feels kinda clumsy, but give this game a while and you will see one of the best nitro-fueled, fast paced combat racing ever created. Lots of cars and uprages, many settings to tune this game to your own style and expectations, tons of humor. Yes, there are some flaws too, but overall it's a pleasure to drive in this gem. Moreover you can get it really cheap on sale and it's definitely worth it's price then.. Very Good Game
